# Admission Standards of Women

"The Naval Academy Office of Admissions outreach and recruiting efforts are designed to attract a cohesive Brigade of Midshipmen that reflects the needs of the naval service and the diversity of the men and women they will lead. We accomplish this by focusing our outreach efforts on congressional districts to develop a deep, diverse candidate pool that supports each district office in nominating their full complement of young men and women to the Naval Academy, pursuant to Title 10 of the US Code. By striving to increase awareness among the young men and women who live in every congressional district, our efforts provide us with a diverse pool of candidates that reflect the nation we serve."
